Summary

Implementation engineer who guides customers through API integrations and resolves technical issues across web and mobile. At FlowSpace I was the technical point of contact for customers integrating booking, CRM, and payment APIs (OfficeRnD, Nexudus, Attio, Stripe). I wrote integration code in JavaScript and TypeScript, debugged API failures across RESTful services, built automation scripts for validation and monitoring, and trained customers on best practices. I also built an internal data pipeline that ingests documents in any format, extracts structured data via API orchestration, and pushes validated results to the backend after human review. I created and maintained technical documentation and onboarding guides, and worked directly with product and engineering to relay customer feedback into platform improvements. I work autonomously on macOS in a fully remote setup within CET hours.

- **JavaScript & API integration:** JavaScript, TypeScript (frontend and backend), React, Next.js, Node.js, REST API design and consumption, API testing and validation scripting, WebSockets, SQL (PostgreSQL, Supabase), Python (scripting, data pipelines, automation), macOS
- **Customer-facing technical work:** API integration guidance, technical onboarding, customer troubleshooting and debugging, log analysis, documentation authoring, training sessions, cross-team collaboration (product, engineering, customer success)
- **Integrations & automation:** Complex API orchestration (rate limits, OAuth, retries, webhooks), third-party integrations (CRM, booking, payment APIs), monitoring and alerting, n8n workflow automation, GitHub Actions CI/CD, Docker, Vercel

- Built RAG-backed support agents that answer customer queries against live platform data and escalate to a person on low confidence. Implemented confidence scoring and retrieval quality monitoring.
- Built integrations against customer APIs and booking systems (OfficeRnD, Nexudus), CRM pipelines (Attio, Amplemarket, Swan), and payment flows (Stripe), iterating quickly on customer feedback.
- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product. Scaled from 2,000 to 4,500+ users.
