Summary

Technical support specialist with production experience supporting and integrating SaaS platforms. At FlowSpace I built integrations against customer APIs and booking systems (OfficeRnD, Nexudus), CRM pipelines (Attio, Amplemarket, Swan), and payment flows (Stripe), handling webhook management, rate limits, and retry logic across service boundaries. I built RAG-backed support agents that answer customer queries against live platform data and escalate on low confidence. I work with REST APIs daily, debug integration issues across multiple systems, and manage data flows between platforms. I use Jira and Agile workflows for task tracking and have experience with automated testing, CI/CD, and production monitoring.

Skills

- **Support & integrations:** SaaS platform support, REST API troubleshooting and integration, webhook management, data flow debugging, CRM and booking system integrations (Attio, Amplemarket, OfficeRnD, Nexudus, Stripe), ticket triage and escalation, Jira, Agile/Scrum
- **Technical:** Python, TypeScript, PHP/Laravel, PostgreSQL, MySQL, Redis, Supabase, background jobs, queues, API design and consumption, data extraction and transformation, automated testing (Jest, Playwright)
- **AI & automation:** LLM API integration, RAG pipelines, AI agent orchestration, n8n workflow automation, prompt engineering, confidence scoring, human-in-the-loop review

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Built an AI listing pipeline that orchestrates multi-step LLM agents with tool use, structured output parsing, and retrieval to ingest documents in any format (PDF, web page, photo, spreadsheet) and push validated results to production after human review. Handles hundreds of sources with different formats.
- Designed human-in-the-loop workflows with schema validation, approval gates, and escalation paths so non-technical staff could safely review and approve AI outputs before they reached production.
- Built integrations against customer APIs and booking systems (OfficeRnD, Nexudus), CRM pipelines (Attio, Amplemarket, Swan), and payment flows (Stripe), managing rate limits, webhooks, and retry logic across service boundaries.
- Built RAG-backed support agents that answer customer queries against live platform data and escalate to a person on low confidence. Implemented confidence scoring and retrieval quality monitoring.
- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product. Scaled from 2,000 to 4,500+ users.

Get2Germany.com **Jan 2024 – May 2024**
