Summary

Backend engineer with production experience in PHP/Laravel, MySQL, and REST API design. At FlowSpace I built and maintained the core Laravel API layer, designed database schemas and migrations, implemented background jobs and queues for asynchronous processing, and built integrations against third-party APIs (booking systems, CRMs, payment platforms) with rate limiting, retry logic, and webhook handling. I also built an AI data pipeline that orchestrates LLM agents with structured output parsing and retrieval to ingest documents in any format and push validated results to production after human review. I work with PostgreSQL, MySQL, Redis, and Supabase, and I ship fast in small teams using Docker, GitHub Actions CI/CD, and automated testing.

Skills

- **Backend:** PHP/Laravel (daily), MySQL, PostgreSQL, Redis, Supabase, REST API design and consumption, database schema design, migrations, Eloquent ORM, background jobs, queues, event-driven architecture, webhook handling, retry and rate-limit logic, data extraction and transformation pipelines
- **AI & integrations:** LLM API integration (OpenAI, Claude/Anthropic), structured output parsing, RAG pipelines, SaaS API integrations (CRM, booking, payment platforms), n8n workflow automation, prompt engineering, AI agent orchestration
- **Infrastructure & delivery:** Docker, GitHub Actions CI/CD, AWS (EC2, S3, CloudWatch), Vercel, automated testing (Jest, Playwright, PHPUnit), production monitoring and logging, Agile/Scrum

Experience

FlowSpace.co — **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) — *London, UK (remote)*

- Built an AI listing pipeline that orchestrates multi-step LLM agents with tool use, structured output parsing, and retrieval to ingest documents in any format (PDF, web page, photo, spreadsheet) and push validated results to production after human review. Handles hundreds of sources with different formats.
- Designed human-in-the-loop workflows with schema validation, approval gates, and escalation paths so non-technical staff could safely review and approve AI outputs before they reached production.
- Built integrations against customer APIs and booking systems (OfficeRnD, Nexudus), CRM pipelines (Attio, Amplemarket, Swan), and payment flows (Stripe), managing rate limits, webhooks, and retry logic across service boundaries.
- Built RAG-backed support agents that answer customer queries against live platform data and escalate to a person on low confidence. Implemented confidence scoring and retrieval quality monitoring.
- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product. Scaled from 2,000 to 4,500+ users.
