Prabhavit Gupta

Full-Stack AI Engineer, Python/FastAPI & React/TypeScript, RAG Pipelines & LLM Orchestration

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy

Summary

Full-stack AI engineer who builds RAG pipelines and LLM-powered products end to end. At FlowSpace I designed and shipped an AI data pipeline that orchestrates LLM agents with structured output parsing, retrieval-augmented generation, and tool use to ingest documents in any format (PDF, web page, spreadsheet) and push validated results to a PostgreSQL backend after human review with strict guardrails. I built the retrieval layer, the agent orchestration logic, the React/Next.js frontend, and the FastAPI-style backend services that tie them together. I also built RAG-backed support agents with vector database retrieval, confidence scoring, and quality monitoring, plus API integrations against third-party systems (booking, CRM, payments). I work across Python, TypeScript, and React, and I ship fast in small teams with full ownership from backend to frontend.

Skills

- **AI & RAG:** RAG pipelines, vector database retrieval (pgvector, embeddings, semantic search), LLM API integration (Claude/Anthropic, OpenAI), prompt engineering, structured output parsing, tool use and function calling, multi-step agent orchestration, confidence scoring, guardrails, human-in-the-loop review, evaluation and monitoring (accuracy, hallucination, latency, cost), AI-native development (Claude Code daily)
- **Full stack:** Python, FastAPI, TypeScript, React, Next.js, PHP/Laravel, REST API design, PostgreSQL, MySQL, Redis, Supabase, background jobs, queues, webhooks, SaaS API integrations (CRM, booking, payment platforms), data extraction and transformation pipelines
- **Infrastructure & delivery:** Docker, GitHub Actions CI/CD, AWS (EC2, S3, CloudWatch), Azure (familiar), Vercel, automated testing (Jest, Playwright), production monitoring, observability, Agile/Scrum

Experience

FlowSpace.co — **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) — *London, UK (remote)*

- Built an AI listing pipeline that orchestrates multi-step LLM agents with tool use, structured output parsing, and retrieval to ingest documents in any format (PDF, web page, photo, spreadsheet) and push validated results to production after human review. Handles hundreds of sources with different formats.
- Designed human-in-the-loop workflows with schema validation, approval gates, and escalation paths so non-technical staff could safely review and approve AI outputs before they reached production.
- Built integrations against customer APIs and booking systems (OfficeRnD, Nexudus), CRM pipelines (Attio, Amplemarket, Swan), and payment flows (Stripe), managing rate limits, webhooks, and retry logic across service boundaries.
- Built RAG-backed support agents that answer customer queries against live platform data and escalate to a person on low confidence. Implemented confidence scoring and retrieval quality monitoring.
- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product. Scaled from 2,000 to 4,500+ users.

Get2Germany.com — **Jan 2024 – May 2024**
Developer & Automation Specialist (Part-time) — *Berlin, Germany*

Integrated Google APIs, built AI tools to find courses, internships and jobs, and optimized the database. Stack: n8n, Google APIs.

Clubee.com — **Sep 2023 – Aug 2024**
Developer & QA (Full-time, Freelance) — *Foetz, Luxembourg*

Integrated the Clubee API across the frontend, ran unit testing and QA, and built shop and federation-dashboard tools.

Tractionboard.co — **Aug 2023 – Oct 2023**
Developer (Internship) — *Utrecht, Netherlands*

Integrated ChatGPT/OpenAI and Sendgrid, built responsive designs, and debugged features.

Freelance Projects

- **Urlink** (2025), Project Manager & AI-Assisted Developer. Worked directly with the client on requirements, built the platform and its logic, and implemented client-driven automations. Stack: Next.js, Supabase, Netlify.
- **UltraStrategy** (2024 to 2025), AI Automation Developer. Built a CV-parsing tool (LLM data extraction) with n8n and Eden AI, and a platform serving different user profiles.
- **Qomodo** (2024 to 2025), AI Developer. Built a dashboard for companies to manage their branches, and implemented Figma designs.

Certifications

Microsoft Copilot Studio Agent Academy • Microsoft: Introduction to building AI agents • Microsoft Power Automate • Tray.AI Build Practitioner (Sep 2024)

Education

Ca' Foscari University of Venice Oct 2020 – Jun 2024

BA Philosophy, International Studies & Economics (Minor: Entrepreneurship)

Work authorization: European Long Term Residence Permit (Italy), no sponsorship needed in the EU; available immediately.
Languages: Hindi (native), English (professional), Italian (beginner).
