Summary

Full-stack product engineer who ships end to end: from data processing and ingestion through core logic to UI. At FlowSpace I owned a live marketplace product built in Next.js and Laravel on PostgreSQL, scaling it from 2,000 to 4,500+ users while building AI features on top. I built an end-to-end data pipeline that ingests documents in any format, extracts structured data using LLM APIs with agentic orchestration, and pushes validated results to the backend after human review. I also shipped RAG-backed support agents with confidence scoring. I work daily in TypeScript and Python, use AI-assisted development as my standard workflow, and thrive in fast-moving startup environments where scope is ambiguous and velocity matters.

Skills

- **Full-stack product development:** TypeScript, React, Next.js, Node.js, Laravel (PHP), PostgreSQL, Supabase, REST APIs, webhooks, end-to-end feature ownership from data layer to UI
- **Applied AI:** LLM API integration (Claude, OpenAI), RAG pipelines, agentic orchestration, tool-use workflows, confidence scoring, AI-assisted development (Claude Code, Cursor), data extraction and validation
- **Infrastructure & integrations:** Python, SQL, Docker, AWS, Git, GitHub Actions, API integrations (Stripe, booking systems, CRM pipelines), n8n workflow automation

- Built integrations against customer APIs and booking systems (OfficeRnD, Nexudus), CRM pipelines (Attio, Amplemarket, Swan), and payment flows (Stripe), iterating quickly on customer feedback.
- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product. Scaled from 2,000 to 4,500+ users.
