Summary

AI and automation engineer who turns business processes into working automated systems using LLMs, APIs, and scripting. At FlowSpace I sat with stakeholders to understand their workflows, identified where automation added real value, and delivered working solutions: an AI pipeline that ingests documents in any format (PDF, web page, photo, spreadsheet), runs multi-stage LLM extraction with agentic orchestration, validates outputs with confidence scoring and automated evals, and pushes clean results to the backend after human-in-the-loop review. I also built RAG-backed support agents with retrieval quality monitoring and escalation logic, and integrated booking systems, CRMs, and payment APIs into production workflows. Claude Code is my primary development tool. I build daily in TypeScript, Node.js, and Python, and use n8n for workflow automation. I scope vague requests into concrete plans, prototype fast, and optimise for the stakeholder's result.

Skills

- **AI & LLM workflows:** Claude Code (primary dev tool), Claude API, OpenAI, Gemini, agentic orchestration, prompt engineering and context optimization, RAG pipelines with retrieval quality monitoring, structured outputs, confidence scoring, evaluation loops, AI-assisted development, Cursor
- **Full-stack & integration:** TypeScript, Node.js, React, Next.js, PHP (Laravel), PostgreSQL, Supabase, REST API design, complex API orchestration (rate limits, OAuth, retries, authentication), end-to-end feature ownership
- **Automation & process engineering:** n8n workflow automation, Make, API integrations (Stripe, booking systems, CRM pipelines), Docker, AWS, Git, GitHub Actions, CI/CD, data extraction and transformation pipelines, business process analysis

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Built an AI listing pipeline that takes documents in any format (PDF, web page, photo or spreadsheet), extracts structured data using LLM APIs with agentic orchestration and retrieval, and pushes validated results to the backend after human review. Handles hundreds of sources with different formats.
- Built RAG-backed support agents that answer customer queries against live platform data and escalate to a person on low confidence. Implemented confidence scoring and retrieval quality monitoring.
- Built integrations against customer APIs and booking systems (OfficeRnD, Nexudus), CRM pipelines (Attio, Amplemarket, Swan), and payment flows (Stripe), iterating quickly on customer feedback.
- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product. Scaled from 2,000 to 4,500+ users.
