## Summary

Applied AI engineer who builds customer-facing AI applications end to end in Python and TypeScript. At FlowSpace I built an agentic data pipeline that ingests documents in any format (PDF, web page, photo, spreadsheet), runs multi-stage LLM extraction with tool-use orchestration and retrieval, validates outputs with confidence scoring, and pushes clean results to the backend after human-in-the-loop review. I also built RAG-backed support agents, integrated half a dozen customer APIs (booking systems, CRMs, payments), and worked directly with customers on requirements and iteration. I ship production code daily in TypeScript, Python, React/Next.js, and Node.js, integrate with multiple LLM providers (Claude, OpenAI), and use agentic coding tools as my default workflow. I am comfortable working across the full stack, jumping between codebases, and translating customer needs into shipped features fast.

## Skills

- **Applied AI & LLMs:** LLM API integration (Claude, OpenAI), RAG pipelines with retrieval quality monitoring, agentic orchestration, tool-use workflows, confidence scoring, multi-stage validation pipelines, AI-assisted development (Claude Code, Cursor)
- **Full-stack engineering:** Python, TypeScript, Node.js, React, Next.js, PostgreSQL, Supabase, REST APIs, end-to-end feature ownership across frontend, backend, and data layer
- **Infrastructure & integrations:** Docker, AWS, Git, GitHub Actions, CI/CD, customer API integrations (Stripe, booking systems, CRM pipelines), n8n workflow automation, data extraction and transformation

## Experience

**FlowSpace.co** **Mar 2024 – Aug 2026**
*Full-Stack & AI Engineer (Full-time, Freelance)* *London, UK (remote)*

- Built an AI listing pipeline that takes documents in any format (PDF, web page, photo or spreadsheet), extracts structured data using LLM APIs with agentic orchestration and retrieval, and pushes validated results to the backend after human review. Handles hundreds of sources with different formats.
- Built RAG-backed support agents that answer customer queries against live platform data and escalate to a person on low confidence. Implemented confidence scoring and retrieval quality monitoring.
- Built integrations against customer APIs and booking systems (OfficeRnD, Nexudus), CRM pipelines (Attio, Amplemarket, Swan), and payment flows (Stripe), iterating quickly on customer feedback.
- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product. Scaled from 2,000 to 4,500+ users.
