Summary

Customer-facing engineer who implements AI workflows and agents on work platforms and stays until the customer runs them alone. At FlowSpace I ran discovery with operators, mapped their processes, and built the agentic document pipeline (human review, structured outputs, retrieval) that processed 900+ records while the platform grew from 2,000 to 4,500+ users, plus support agents, CRM and booking automations in n8n and Make. I train users, write the handover docs, and know when a deterministic automation beats an agent. Advanced English, CET, open to Paris.

Skills

- **Implementation & consulting:** Discovery and business-process mapping, relational data modelling, project scoping and delivery, customer training and demos, handover documentation, stakeholder management across ops, sales and agency teams
- **AI workflows & agents:** Agentic pipelines with human-in-the-loop review, structured outputs, retrieval, evaluation of outputs, Claude and OpenAI APIs, Claude Code (daily), MCP, prompt engineering, knowing when deterministic automation is the right answer
- **Integration platforms & code:** n8n, Make, Zapier, REST and GraphQL APIs, webhooks, OAuth, CRM (Attio, HubSpot-style pipelines), booking and payment integrations, TypeScript, Python, PostgreSQL, Supabase

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Built an AI listing pipeline that takes documents in any format (PDF, web page, photo or spreadsheet), extracts structured data using LLM APIs with agentic orchestration and retrieval, and pushes validated results to the backend after human review. Handles hundreds of sources with different formats.
- Built RAG-backed support agents that answer customer queries against live platform data and escalate to a person on low confidence. Implemented confidence scoring and retrieval quality monitoring.
- Built integrations against customer APIs and booking systems (OfficeRnD, Nexudus), CRM pipelines (Attio, Amplemarket, Swan), and payment flows (Stripe), iterating quickly on customer feedback.
- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product. Scaled from 2,000 to 4,500+ users.
