Summary

I build data and integration pipelines that turn unstructured sources into structured, AI-ready services. At FlowSpace I built an end-to-end pipeline that ingests documents in any format (PDFs, web pages, photos, spreadsheets), extracts and validates structured data using LLM APIs with agentic orchestration and retrieval patterns, and pushes clean results to a PostgreSQL backend after human-in-the-loop review. I also built RAG-backed support agents with confidence scoring that search live platform data and escalate on low confidence. I code daily in Python and TypeScript, use Claude Code and agentic workflows as part of my standard development process, and have shipped Docker-based services to production.

Skills

- **Data integration & AI pipelines:** unstructured-to-structured extraction at scale, RAG pipelines, embeddings, LLM-agent orchestration (Claude and OpenAI APIs), tool-use workflows, confidence scoring, human-in-the-loop review, agentic coding (Claude Code, Cursor)
- **Languages & platforms:** Python, TypeScript, JavaScript, Node.js, SQL, Docker, REST APIs, webhooks, PostgreSQL, Supabase, AWS, Git, GitHub Actions
- **Full-stack & integrations:** React, Next.js, Laravel (PHP), API integrations (OfficeRnD, Nexudus, Stripe, CRM systems), n8n workflow automation, data transformation and validation pipelines

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Built an AI listing pipeline that takes documents in any format (PDF, web page, photo or spreadsheet), extracts structured data using LLM APIs with agentic orchestration and retrieval, and pushes validated results to the backend after human review. Handles hundreds of sources with different formats.
- Built RAG-backed support agents that answer customer queries against live platform data and escalate to a person on low confidence. Implemented confidence scoring and retrieval quality monitoring.
- Built integrations against customer APIs and booking systems (OfficeRnD, Nexudus), CRM pipelines (Attio, Amplemarket, Swan), and payment flows (Stripe), iterating quickly on customer feedback.
- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product. Scaled from 2,000 to 4,500+ users.
