Summary

Product engineer who owns features end to end across React, TypeScript, Node.js, and Python. At FlowSpace I built an AI data pipeline with agentic orchestration and human-in-the-loop review, designed conversational support agents with confidence scoring and escalation, and shipped integrations against booking, CRM, and payment APIs, iterating fast on customer feedback. I migrated the company's live SaaS marketplace from a legacy stack to a coded Next.js and Node.js product, scaling from 2,000 to 4,500+ users. Claude Code is my primary development tool; I use AI coding agents daily for prototyping, architecture, and review. I thrive in startup environments, work autonomously in remote settings within CET hours, and take ownership from product design through production deploy.

Skills

- **Frontend:** React, Next.js (App Router, SSR, server components), TypeScript, JavaScript, Tailwind CSS, responsive UI, component architecture, Vercel deployment, end-to-end feature ownership from design collaboration through production
- **Backend & infrastructure:** Node.js, TypeScript (backend), Python (AI agent backends, scripting, data pipelines), PostgreSQL, Supabase (auth, storage, realtime, edge functions), REST API design, WebSockets, Docker, AWS basics, GitLab CI/CD, GitHub Actions, complex API orchestration (rate limits, OAuth, retries, webhooks)
- **AI & agentic systems:** Claude Code (primary dev tool), Cursor, agentic orchestration (multi-step pipelines, human-in-the-loop review), conversational AI flows, Claude and OpenAI API integration, prompt engineering, output verification, n8n workflow automation, degradation control via tests under agentic changes

Experience

Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Built an AI listing pipeline that takes documents in any format (PDF, web page, photo or spreadsheet), extracts structured data using LLM APIs with agentic orchestration and retrieval, and pushes validated results to the backend after human review. - Built integrations against customer APIs and booking systems (OfficeRnD, Nexudus), CRM pipelines (Attio, Amplemarket, Swan), and payment flows (Stripe), iterating quickly on customer feedback.
- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product. Scaled from 2,000 to 4,500+ users.
