Summary

Forward deployed engineer who embeds with operational teams to scope, build, and own AI-powered automation in production. At FlowSpace I built and ran AI agents and automation pipelines that replaced manual work across operations, CRM, finance, and customer support, connecting dozens of SaaS platforms via REST APIs and webhooks. I owned the full lifecycle of production AI systems: prompt engineering, escalation logic, performance monitoring, and continuous improvement. I integrated OpenAI and Claude APIs into daily workflows for document extraction, structured data validation, and customer query handling with confidence scoring and human escalation. I scope problems independently, ship fast, and treat every automation as a product I run, not a project I hand off.

Skills

- **AI agents & automation:** Production AI agent lifecycle (prompt engineering, escalation logic, routing, QA, monitoring), automation pipelines (n8n, Zapier-style orchestration), API integrations (REST, webhooks, OAuth, rate limiting), SaaS platform connectors (CRM, finance, booking, payment systems)
- **AI/LLM systems:** OpenAI API, Claude API (Anthropic), agentic orchestration, RAG systems, structured output parsing, confidence scoring, LLM-driven data extraction, evaluation and monitoring
- **Development:** Python, JavaScript, TypeScript, Node.js, React, Next.js, SQL (PostgreSQL, MySQL, Supabase, Redis), Docker, Linux, Git, GitHub Actions CI/CD, low-code tools (Retool, internal dashboards), Vercel, AWS

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Built an AI listing pipeline that takes documents in any format (PDF, web page, photo or spreadsheet), extracts structured data using LLM APIs with agentic orchestration and retrieval, and pushes validated results to the backend after human review. Handles hundreds of sources with different formats.
- Built RAG-backed support agents that answer customer queries against live platform data and escalate to a person on low confidence. Implemented confidence scoring and retrieval quality monitoring.
- Built integrations against customer APIs and booking systems (OfficeRnD, Nexudus), CRM pipelines (Attio, Amplemarket, Swan), and payment flows (Stripe), iterating quickly on customer feedback.
- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product. Scaled from 2,000 to 4,500+ users.
