Summary

Test automation engineer with two years of hands-on QA experience: automated test suites in TypeScript with Playwright for end-to-end and integration testing. At Clubee I integrated a partner API across the frontend and owned unit testing and QA; at FlowSpace I write and run Playwright suites against a live product through continuous releases and CI (GitHub Actions), protecting a platform that scaled from 2,000 to 4,500+ users through a migration off a legacy stack to Next.js and Laravel. I review and expand test coverage as features change, and use AI coding tools daily to speed up test generation, work that maps onto evaluating AI-assisted and agent-based testing approaches.

Skills

- **Test automation & QA:** TypeScript, Playwright (end-to-end and integration testing), unit testing, test case design and review, expanding test coverage as features change, CI pipelines (GitHub Actions), Git
- **Full stack & tooling:** Next.js, Node.js, Python (scripting and automation), REST API integrations, PostgreSQL, Supabase, Docker (working knowledge), debugging across frontend and backend
- **AI-assisted engineering:** Claude Code (daily driver for test generation, code review, and debugging), prompt engineering, evaluating AI agent-based tooling for automating test implementation and verification

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Built an AI listing pipeline that takes documents in any format (PDF, web page, photo or spreadsheet), extracts structured data using LLM APIs with agentic orchestration and retrieval, and pushes validated results to the backend after human review. Handles hundreds of sources with different formats.
- Built RAG-backed support agents that answer customer queries against live platform data and escalate to a person on low confidence. Implemented confidence scoring and retrieval quality monitoring.
- Built integrations against customer APIs and booking systems (OfficeRnD, Nexudus), CRM pipelines (Attio, Amplemarket, Swan), and payment flows (Stripe), iterating quickly on customer feedback.
- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product. Scaled from 2,000 to 4,500+ users.
