Summary

Forward-deployed engineer who owns technical delivery from discovery to go-live and stands behind the result in front of the customer. At FlowSpace I built the production full stack (Next.js, Node.js, Laravel, Python, PostgreSQL) of a live marketplace, shipped integrations against OfficeRnD, Nexudus, CRM and payment APIs, and built an agentic data pipeline with human review that processed 900+ records while the platform grew from 2,000 to 4,500+ users. I instrument what I ship, measure against the baseline, and hand over so the customer can run it without me. Fluent English, based in Venice, open to Paris and customer travel.

Skills

- **Production full stack:** TypeScript, Next.js, Node.js, Laravel (PHP), Python, PostgreSQL, Supabase, REST API design, webhooks, OAuth, Docker (working knowledge), Vercel, GitHub Actions, observability and monitoring of live systems
- **Customer delivery:** Discovery with operators and executives, requirements challenge, configuration and extensions on a live platform, integrations to customer systems, measuring outcomes against baseline, demos and proofs of concept, knowledge transfer and clean handovers
- **Applied AI:** LLM pipelines with structured outputs, retrieval and human-in-the-loop review, evaluation against reference data, Claude and OpenAI APIs, Claude Code (daily), n8n; AI tool adoption across a non-technical team

Experience

Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Built an AI listing pipeline that takes documents in any format (PDF, web page, photo or spreadsheet), extracts structured data using LLM APIs with agentic orchestration and retrieval, and pushes validated results to the backend after human review. Handles hundreds of sources with different formats.
- Built RAG-backed support agents that answer customer queries against live platform data and escalate to a person on low confidence. Implemented confidence scoring and retrieval quality monitoring.
- Built integrations against customer APIs and booking systems (OfficeRnD, Nexudus), CRM pipelines (Attio, Amplemarket, Swan), and payment flows (Stripe), iterating quickly on customer feedback.
- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product. Scaled from 2,000 to 4,500+ users.
