Summary

AI automation specialist with hands-on n8n production experience and deep API integration skills. At FlowSpace I built and maintained n8n workflows that automated business processes across operations, CRM, finance, and customer communications, connecting dozens of SaaS platforms via REST APIs and webhooks. I integrated OpenAI and Claude APIs into production pipelines for document extraction, data validation, and customer support automation. I designed automation architectures that replaced manual work across multiple business functions, monitored workflow health, and iterated on reliability. I work autonomously in a fully remote setup and manage my own schedule across European time zones.

Skills

- **Workflow automation:** n8n (production, complex multi-step flows), API orchestration (REST, webhooks, OAuth, rate limiting, retries), SaaS platform integrations (CRM, finance, HR, marketing tools), Zapier, Make.com, automation architecture design
- **AI integration:** OpenAI API, Claude API, LLM-driven data extraction pipelines, prompt engineering, RAG systems, AI agent orchestration, structured output parsing, confidence scoring
- **Development & data:** JavaScript, TypeScript, Python, Node.js, React, Next.js, SQL (PostgreSQL, Supabase, MySQL), Docker, Git, GitHub Actions CI/CD, Vercel

- Built integrations against customer APIs and booking systems (OfficeRnD, Nexudus), CRM pipelines (Attio, Amplemarket, Swan), and payment flows (Stripe), iterating quickly on customer feedback.
