Summary

At FlowSpace I built and owned the GTM automation layer end to end, connecting CRM, outbound, payments and booking platforms into automated n8n workflows that served a revenue team daily. I also built AI agents in production using Claude and OpenAI, including a pipeline that ingests brochures in any format, drafts content with an LLM, and pushes it after human review. I write production code in TypeScript, Python and JavaScript, work comfortably with REST APIs, webhooks and JSON, and I think in systems that keep running without me watching.

Skills

- **GTM automation & outbound systems:** n8n workflow orchestration (primary tool), Make.com, Zapier, CRM/GTM pipeline automation, REST APIs, webhooks, JSON, third-party integrations (Attio, Amplemarket, Swan, OfficeRnD, Nexudus, Google, Sendgrid)
- **AI & prompt engineering:** Claude (daily driver, both in code and in automation workflows), OpenAI/GPT-4, LLM-powered data extraction and enrichment, AI agents in production, human-in-the-loop review systems
- **Languages & data:** TypeScript, JavaScript, Node.js, Python, SQL, PostgreSQL, Supabase, Next.js, React, Laravel (PHP)
- **Ways of working:** systems thinking, building repeatable processes, client-facing communication, owning problems end to end

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Built CRM and GTM automations with n8n, including a pipeline connecting Attio, Amplemarket and Swan, plus OfficeRnD and Nexudus booking integrations. These workflows served the revenue team daily.
- Built an AI listing bot with a human in the loop: it takes a brochure in any format (PDF, web page, photo or spreadsheet), drafts the full listing with an LLM, and pushes it to the backend after review.
- Built support AI agents that answer customer queries against live platform data and escalate to a person on low confidence.
- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product, mapping the data model and driving the cutover. Scaled it from 2,000 to 4,500+ users.
- Worked directly with the internal team, an external agency and customers, and resolved issues end to end.
