Summary

Fullstack engineer who builds end-to-end features across web applications, backend services, and data layers. At FlowSpace I built and maintained a coworking marketplace (Next.js frontend, Laravel/PHP backend, PostgreSQL) that scaled to 4,500+ users, integrated payment flows (Stripe), booking systems (OfficeRnD, Nexudus), and CRM pipelines, and shipped an AI data pipeline with multi-stage extraction and validation. I work across the full stack daily in TypeScript, React/Next.js, Node.js, Python, and PHP, with hands-on PostgreSQL schema design, migrations, and API development. I pick up new languages and frameworks quickly and have shipped production code across multiple codebases. I am comfortable with on-call reliability, code reviews, and collaborating with product managers, designers, and business partners to ship features that matter.

Skills

- **Fullstack engineering:** TypeScript, React, Next.js, Node.js, Python, PHP (Laravel), PostgreSQL, Supabase, REST API design, database schema design and migrations, end-to-end feature ownership across frontend, backend, and data layer
- **Backend services & data:** API integrations (Stripe, booking systems, CRM pipelines), data extraction and transformation pipelines, validation and confidence scoring, query optimization (PostgreSQL), AI-assisted development (Claude Code, Cursor)
- **Infrastructure & tooling:** Docker, AWS, Git, GitHub Actions, CI/CD, on-call reliability practices, n8n workflow automation, cross-team collaboration with product managers, designers, and business stakeholders

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Built an AI listing pipeline that takes documents in any format (PDF, web page, photo or spreadsheet), extracts structured data using LLM APIs with agentic orchestration and retrieval, and pushes validated results to the backend after human review. Handles hundreds of sources with different formats.
- Built RAG-backed support agents that answer customer queries against live platform data and escalate to a person on low confidence. Implemented confidence scoring and retrieval quality monitoring.
- Built integrations against customer APIs and booking systems (OfficeRnD, Nexudus), CRM pipelines (Attio, Amplemarket, Swan), and payment flows (Stripe), iterating quickly on customer feedback.
- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product. Scaled from 2,000 to 4,500+ users.
