Summary

Frontend-focused product engineer who ships React and TypeScript applications end to end. At FlowSpace I built the review UI for an AI data pipeline (Next.js, Tailwind CSS, Supabase auth and storage), migrated a live SaaS marketplace from a legacy stack to a coded Next.js frontend with a Laravel API, and shipped features iteratively based on real user feedback, scaling the product from 2,000 to 4,500+ users. I built Urlink from scratch as a Supabase-powered Next.js app, owning the full stack from database schema to polished UI. I use AI coding agents (Claude Code, Cursor) daily to move faster, and I treat tests, types, and CI as tools for speed, not overhead. I work autonomously in fully remote, async environments and take ownership from first prototype through production.

Skills

- **Frontend:** React, Next.js (App Router, SSR, server components), TypeScript, JavaScript, Tailwind CSS, responsive UI, component architecture, accessibility, Vercel deployment, product analytics integration, end-to-end feature ownership from design collaboration through production
- **Backend & infrastructure:** Node.js, Supabase (auth, storage, realtime, edge functions, Postgres), PostgreSQL, PHP (Laravel), REST API design, complex API orchestration (rate limits, OAuth, retries, webhooks), third-party integrations (CRM, booking, payment), Python scripting, Docker, Git, GitHub Actions, CI/CD
- **AI-augmented workflow:** Claude Code (primary dev tool), Cursor, daily use of AI coding agents for prototyping, code review, and iteration, Claude and OpenAI API integration, prompt engineering, agentic orchestration, n8n workflow automation

Experience

FlowSpace.co — **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) — *London, UK (remote)*

- Built an AI listing pipeline that takes documents in any format (PDF, web page, photo or spreadsheet), extracts structured data using LLM APIs with agentic orchestration and retrieval, and pushes validated results to the backend after human review. Handles hundreds of sources with different formats.
- Built RAG-backed support agents that answer customer queries against live platform data and escalate to a person on low confidence. Implemented confidence scoring and retrieval quality monitoring.
- Built integrations against customer APIs and booking systems (OfficeRnD, Nexudus), CRM pipelines (Attio, Amplemarket, Swan), and payment flows (Stripe), iterating quickly on customer feedback.
- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product. Scaled from 2,000 to 4,500+ users.
