Summary

Support engineer with hands-on PostgreSQL and API debugging experience, focused on helping developers resolve technical issues quickly. At FlowSpace I ran a production PostgreSQL database (Supabase-hosted) serving 4,500+ users, wrote complex SQL queries for data migrations and reporting, and debugged API integration failures by tracing requests across services. I triaged customer-reported issues, reproduced bugs, documented fixes, and fed patterns back to engineering. I monitored GitHub Issues and community channels, built internal tooling to speed up support workflows, and wrote technical documentation and onboarding guides. I work autonomously in a fully remote setup within European time zones (CET).
