Summary

AI-augmented full-stack engineer who ships features end to end using React, TypeScript, Node.js, and PostgreSQL. Claude Code is my primary development tool, and I use AI agents (Cursor, Claude, OpenAI APIs) daily for prototyping, code review, and iteration. At FlowSpace I owned features from task breakdown through production deploy, built an AI data pipeline with agentic orchestration and human-in-the-loop review, and migrated a live SaaS marketplace from a legacy stack to a coded Next.js and Node.js product, scaling from 2,000 to 4,500+ users. I work autonomously in fully remote, async environments with CET-aligned hours and take ownership across backend, frontend, and basic infrastructure.

Skills

- **Frontend:** React, Next.js (App Router, SSR, server components), TypeScript, JavaScript, Tailwind CSS, responsive UI, component architecture, Vercel deployment, end-to-end feature ownership from design collaboration through production
- **Backend & infrastructure:** Node.js, PostgreSQL, Supabase (auth, storage, realtime, edge functions), PHP (Laravel), REST API design, Redis caching, Docker, GitLab CI/CD, GitHub Actions, complex API orchestration (rate limits, OAuth, retries, webhooks), third-party integrations (CRM, booking, payment)
- **AI-augmented workflow:** Claude Code (primary dev tool), Cursor, agentic workflows (plan mode, REPL-style iteration), prompt engineering, output verification and review, Claude and OpenAI API integration, n8n workflow automation, degradation control via tests under agentic changes

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Built an AI listing pipeline that takes documents in any format (PDF, web page, photo or spreadsheet), extracts structured data using LLM APIs with agentic orchestration and retrieval, and pushes validated results to the backend after human review. Handles hundreds of sources with different formats.
- Built RAG-backed support agents that answer customer queries against live platform data and escalate to a person on low confidence. Implemented confidence scoring and retrieval quality monitoring.
- Built integrations against customer APIs and booking systems (OfficeRnD, Nexudus), CRM pipelines (Attio, Amplemarket, Swan), and payment flows (Stripe), iterating quickly on customer feedback.
- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product. Scaled from 2,000 to 4,500+ users.
