Summary

I deploy AI into customer environments end to end. At FlowSpace I built and own an AI listing pipeline in production that turns unstructured input (PDF, website, image, spreadsheet) into structured backend records with confidence scoring and human-in-the-loop review, plus support AI agents with confidence-based escalation. I have integrated OfficeRnD, Nexudus, Attio, Amplemarket, Swan, Google, Sendgrid and Stripe, embedded with operational teams to translate customer problems into production solutions, and delivered end to end across the platform's growth from 2,000 to 4,500+ users. Three years across eight European tech companies, coding daily in TypeScript, Node.js and Python; freelance/B2B-native since day one.

Skills

- **Workflow automation & integration:** n8n (2+ years production use), REST APIs, webhooks, OAuth/OIDC, data transformation between systems, third-party platform integrations (Attio, Amplemarket, Swan, OfficeRnD, Nexudus, Google, Stripe, Sendgrid)
- **Customer-facing delivery:** embedding with operational teams, translating messy business problems into production automation solutions, running deployments end to end, building solutions customers can own and operate
- **AI agents & LLM systems:** production AI agents (Claude and OpenAI APIs), structured data extraction from unstructured sources, confidence scoring, human-in-the-loop review, multi-step agent orchestration
- **Languages & platforms:** TypeScript, JavaScript, Node.js, Python, Next.js, React, Laravel (PHP), PostgreSQL, Supabase, Vercel, Git

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product, mapping the data model and driving the cutover. Scaled it from 2,000 to 4,500+ users.
- Built an AI listing bot with a human in the loop: it takes a brochure in any format (PDF, web page, photo or spreadsheet), drafts the full listing with an LLM, and pushes it to the backend after review.
- Built support AI agents that answer customer queries against live platform data and escalate to a person on low confidence.
- Built CRM and GTM automations with n8n, including a pipeline connecting Attio, Amplemarket and Swan, plus OfficeRnD and Nexudus booking integrations.
- Worked directly with the internal team, an external agency and customers, and resolved issues end to end.
