## Summary

I lead the technical transformation of live products end to end. At FlowSpace I owned the migration of a live marketplace off a legacy stack onto a coded Next.js and Laravel platform, ran the data model mapping and cutover, and shipped production AI agents on top; the product went from 2,000 to 4,500+ users. I have partnered directly with customers, internal teams and an external agency in complex technical delivery, and I write production code every day in TypeScript, Node.js and Python. Three years across eight European tech companies, plus Microsoft Copilot Studio and Power Automate certifications for the enterprise adjacencies.

- **Workflow automation & integration:** n8n (2+ years production use), REST APIs, webhooks, OAuth/OIDC, third-party integrations (Attio, Amplemarket, Swan, OfficeRnD, Nexudus, Google, Stripe, Sendgrid), Microsoft Power Automate, Tray.ai Build Practitioner

## Experience

**FlowSpace.co** — **Mar 2024 – Aug 2026**
*Full-Stack & AI Engineer (Full-time, Freelance)* — *London, UK (remote)*

- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product, mapping the data model and driving the cutover. Scaled it from 2,000 to 4,500+ users.
- Built an AI listing bot with a human in the loop: it takes a brochure in any format (PDF, web page, photo or spreadsheet), drafts the full listing with an LLM, and pushes it to the backend after review.
- Built support AI agents that answer customer queries against live platform data and escalate to a person on low confidence.
- Built CRM and GTM automations with n8n, including a pipeline connecting Attio, Amplemarket and Swan, plus OfficeRnD and Nexudus booking integrations.
- Worked directly with the internal team, an external agency and customers, and resolved issues end to end.
