Summary

AI-native full-stack engineer who builds production agentic AI systems using Claude Code as my primary development environment. At FlowSpace I built an agentic data pipeline that ingests documents in any format (PDF, web page, spreadsheet, photo), extracts structured data using LLM APIs with multi-step orchestration and RAG retrieval, and pushes validated results to the backend after human review. I integrated OpenAI and Claude APIs across production workflows for document extraction, data validation, and customer support automation. I built RAG-backed agents with confidence scoring, shipped customer-facing integrations against third-party APIs, and owned delivery end-to-end from architecture through production. I use Claude Code daily for all engineering work, and I operate autonomously in a fully remote setup across European time zones.

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Built an AI listing pipeline that takes documents in any format (PDF, web page, photo or spreadsheet), extracts structured data using LLM APIs with agentic orchestration and retrieval, and pushes validated results to the backend after human review. Handles hundreds of sources with different formats.
- Built RAG-backed support agents that answer customer queries against live platform data and escalate to a person on low confidence. Implemented confidence scoring and retrieval quality monitoring.
- Built integrations against customer APIs and booking systems (OfficeRnD, Nexudus), CRM pipelines (Attio, Amplemarket, Swan), and payment flows (Stripe), iterating quickly on customer feedback.
- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product. Scaled from 2,000 to 4,500+ users.
