Summary

At FlowSpace I built and operated AI agents in production that extract structured data from unstructured sources (PDFs, web pages, photos, spreadsheets), draft content, validate output, and push to a backend after human review. I designed multi-step pipelines with conditional logic, confidence scoring and escalation to a human on low confidence. I also built workflow orchestration systems with n8n connecting CRM, outbound, payments and booking platforms into automated pipelines. I code daily in TypeScript and Node.js, use Python for scripting and data tasks, and use Claude and OpenAI APIs as core tools.

Skills

- **AI agents & LLM pipelines:** AI agents built and operated in production, LLM APIs (OpenAI, Claude), structured data extraction from unstructured sources, prompt engineering, confidence scoring, human-in-the-loop review, multi-step orchestration
- **Automation & integration:** n8n workflow orchestration, REST APIs, webhooks, third-party integrations (Attio, Amplemarket, Swan, OfficeRnD, Nexudus, Google, Sendgrid), CI/CD
- **Languages & data:** TypeScript, JavaScript, Node.js, Python, SQL, PostgreSQL, Supabase, Next.js, React, Laravel (PHP)
- **Ways of working:** systems thinking, building pipelines that run autonomously, end-to-end ownership, iterating on real-world feedback

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Built an AI listing bot with a human in the loop: it takes a brochure in any format (PDF, web page, photo or spreadsheet), uses an LLM to extract and draft the full listing, validates the output, and pushes it to the backend after review.
- Built support AI agents that answer customer queries against live platform data and escalate to a person on low confidence.
- Built CRM and GTM automations with n8n, including a pipeline connecting Attio, Amplemarket and Swan, plus OfficeRnD and Nexudus booking integrations. These workflows served the revenue team daily.
- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product. Scaled it from 2,000 to 4,500+ users.
- Worked directly with the internal team, an external agency and customers, and resolved issues end to end.
