Summary

Full-stack engineer who takes AI products from prototype to production. At FlowSpace I built an agentic listing pipeline (TypeScript, Python, LLM APIs) that extracts data from documents and pushes validated records to the backend after human review, plus support agents that answer live queries with confidence scoring and escalation. I led a live migration off a legacy stack onto coded Next.js, scaling FlowSpace from 2,000 to 4,500+ users, and shipped OfficeRnD and Nexudus integrations. I have working knowledge of Python backend services (FastAPI/Flask) and Docker, use Claude Code daily, and work independently within CET hours with full ownership end to end.

Skills

- **Next.js frontend & Python backend:** TypeScript, Next.js on Vercel, Node.js, Python for backend services (working knowledge of FastAPI/Flask), PostgreSQL, Supabase, REST APIs, Docker (working knowledge), GitHub Actions
- **AI agent systems & LLM workflows:** Claude Code (primary dev tool), Cursor, agentic orchestration (tool calling, human-in-the-loop review), Claude/OpenAI API integration, prompt engineering, n8n automation, agent evaluation
- **Integrations & secure data handling:** API orchestration (rate limits, OAuth, retries, webhooks), third-party integrations (CRM, booking, payment), safe handling of sensitive data, production monitoring

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Built an AI listing pipeline that takes documents in any format (PDF, web page, photo or spreadsheet), extracts structured data using LLM APIs with agentic orchestration and retrieval, and pushes validated results to the backend after human review. Handles hundreds of sources with different formats.
- Built RAG-backed support agents that answer customer queries against live platform data and escalate to a person on low confidence. Implemented confidence scoring and retrieval quality monitoring.
- Built integrations against customer APIs and booking systems (OfficeRnD, Nexudus), CRM pipelines (Attio, Amplemarket, Swan), and payment flows (Stripe), iterating quickly on customer feedback.
- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product. Scaled from 2,000 to 4,500+ users.
