Summary

I build AI-powered automations that replace messy manual workflows for real business operations. At FlowSpace I built production n8n pipelines connecting CRM, outbound, payments and booking platforms, and built an AI listing bot that takes unstructured data in any format (PDFs, web pages, photos, spreadsheets), extracts structured information with LLMs, and pushes results to the backend after human review. I worked directly with customers and operational teams to map their processes, build automation solutions, and own those automations in production. I code daily in TypeScript, Node.js and Python.

Skills

- **Workflow automation & AI agents:** n8n (2+ years production use), AI agents with human-in-the-loop review, structured data extraction from unstructured sources (LLMs), prompt engineering, error handling, fallbacks, production monitoring of automated workflows
- **Process mapping & customer delivery:** mapping undocumented business operations into structured automations, leading discovery with operational teams, owning automations end to end from build through production
- **Integration & platforms:** REST APIs, webhooks, OAuth/OIDC, third-party integrations (Attio, Amplemarket, Swan, OfficeRnD, Nexudus, Google, Stripe, Sendgrid), data transformation between systems
- **Languages:** TypeScript, JavaScript, Node.js, Python, Next.js, React, Laravel (PHP), PostgreSQL, Supabase, Git

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product, mapping the data model and driving the cutover. Scaled it from 2,000 to 4,500+ users.
- Built an AI listing bot with a human in the loop: it takes a brochure in any format (PDF, web page, photo or spreadsheet), drafts the full listing with an LLM, and pushes it to the backend after review.
- Built support AI agents that answer customer queries against live platform data and escalate to a person on low confidence.
- Built CRM and GTM automations with n8n, including a pipeline connecting Attio, Amplemarket and Swan, plus OfficeRnD and Nexudus booking integrations.
- Worked directly with the internal team, an external agency and customers, and resolved issues end to end.
