Summary

Product engineer who builds AI-native products end to end and ships them fast. At FlowSpace I owned the full lifecycle of an AI data pipeline: from user-facing interfaces through agent orchestration to production backend. I built LLM-powered workflows that ingest documents in any format, extract structured data with tool use and structured output parsing, evaluate confidence, and push validated results to production after human review. I built customer-facing tools, internal dashboards, and API integrations, making product decisions directly with stakeholders and iterating based on real user feedback. I developed TypeScript and Python services, built Next.js frontends, and maintained production systems handling concurrent users. I build with AI daily using Claude Code as my primary development tool, shipping what used to take a team in a fraction of the time.

Skills

- **Product & AI:** End-to-end product ownership, LLM API integration (OpenAI, Claude/Anthropic), AI agent orchestration, tool use (MCP-style patterns), structured output parsing, prompt engineering, RAG pipelines, confidence scoring, human escalation and feedback loops, product decisions with stakeholders
- **Full stack:** TypeScript, Python, PHP/Laravel, Next.js, React, REST API design, PostgreSQL, MySQL, Redis, Supabase, background jobs, queues, retry and idempotency patterns, event-driven architecture
- **Shipping & tools:** AI-native development (Claude Code daily), Docker, GitHub Actions CI/CD, Linux, AWS, Vercel, testing (Jest, Playwright), Git, rapid iteration, production monitoring

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Built an AI listing pipeline that takes documents in any format (PDF, web page, photo or spreadsheet), extracts structured data using LLM APIs with agentic orchestration and retrieval, and pushes validated results to the backend after human review. Handles hundreds of sources with different formats.
- Built RAG-backed support agents that answer customer queries against live platform data and escalate to a person on low confidence. Implemented confidence scoring and retrieval quality monitoring.
- Built integrations against customer APIs and booking systems (OfficeRnD, Nexudus), CRM pipelines (Attio, Amplemarket, Swan), and payment flows (Stripe), iterating quickly on customer feedback.
- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product. Scaled from 2,000 to 4,500+ users.
