Summary

AI product developer who builds LLM-powered features from concept to production using AI-assisted development as a primary workflow. At FlowSpace I identified operational bottlenecks, prototyped solutions rapidly, and shipped AI-powered tools that replaced manual work across the business. I built an AI data pipeline that ingests documents in any format, extracts structured data using LLM APIs with agentic orchestration, and pushes validated results after human review. I built RAG-backed support agents with confidence scoring and human escalation. I use Claude Code and LLM APIs daily as my primary development tools, turning ideas into working software through fast iteration and experimentation. I own features end to end: discovery, prototyping, building, testing, and iterating based on user feedback.

Skills

- **AI product development:** Rapid prototyping and iteration, concept-to-launch ownership, AI-assisted development workflows (Claude Code, LLM APIs as primary build tools), product discovery, UX-focused feature design, MVP building and validation, user feedback loops
- **AI/LLM systems:** OpenAI API, Claude API (Anthropic), AI agent orchestration, RAG systems, structured output parsing, prompt engineering, confidence scoring, LLM-driven data extraction, synthetic media tools
- **Development:** TypeScript, JavaScript, React, Next.js, Node.js, Python, SQL (PostgreSQL, MySQL, Supabase, Redis), Docker, Linux, Git, GitHub Actions CI/CD, Vercel, AWS, API integrations (REST, webhooks, OAuth)

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Built an AI listing pipeline that takes documents in any format (PDF, web page, photo or spreadsheet), extracts structured data using LLM APIs with agentic orchestration and retrieval, and pushes validated results to the backend after human review. Handles hundreds of sources with different formats.
- Built RAG-backed support agents that answer customer queries against live platform data and escalate to a person on low confidence. Implemented confidence scoring and retrieval quality monitoring.
- Built integrations against customer APIs and booking systems (OfficeRnD, Nexudus), CRM pipelines (Attio, Amplemarket, Swan), and payment flows (Stripe), iterating quickly on customer feedback.
- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product. Scaled from 2,000 to 4,500+ users.
