## Summary

I ship full-stack consumer products across frontend and backend, measuring impact and iterating fast. At FlowSpace I took over a live marketplace on a legacy stack and drove the migration to React (Next.js) and a REST API layer (Laravel), mapping the data model, building the APIs, and shipping the cutover that scaled the platform from 2,000 to 4,500+ users. I then built the AI layer on top: a document processing pipeline, support agents against live data, and CRM automations connecting multiple third-party platforms. I write TypeScript, React, Node.js, Python and PostgreSQL, and I use AI tools daily to increase productivity across every stage of development.

## Skills

- **Languages & frameworks:** TypeScript, JavaScript, React, Next.js, Node.js, Express, Python, PostgreSQL, Redis, Supabase, Laravel (PHP)
- **Full-stack engineering:** REST API design and operation at scale, data modelling, async processing, failure handling, CI/CD, code review, end-to-end feature ownership from ideation through deployment
- **AI & productivity:** Claude Code as primary dev environment (daily for 1+ year), LLM APIs in production (structured outputs, RAG, document processing), AI-first development workflow
- **Integrations & automation:** REST APIs, webhooks, third-party platform integrations (Attio, OfficeRnD, Nexudus, Amplemarket), n8n workflow orchestration

## Experience

**FlowSpace.co** **Mar 2024 – Aug 2026**
*Full-Stack & AI Engineer (Full-time, Freelance)* *London, UK (remote)*

- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product, mapping the data model and driving the cutover. Scaled it from 2,000 to 4,500+ users.
- Built an AI listing bot with a human in the loop: it takes a brochure in any format (PDF, web page, photo or spreadsheet), drafts the full listing with an LLM, and pushes it to the backend after review.
- Built support AI agents that answer customer queries against live platform data and escalate to a person on low confidence.
- Built CRM and GTM automations with n8n, including a pipeline connecting Attio, Amplemarket and Swan, plus OfficeRnD and Nexudus booking integrations.
- Worked directly with the internal team, an external agency and customers, and resolved issues end to end.
