Summary

Technical account manager and engineer who bridges product teams and clients through hands-on API expertise. At FlowSpace I was the primary technical contact for customers integrating with our platform: I guided them through REST API setup, debugged JSON payloads and webhook configurations in Postman, wrote integration documentation, and resolved post-integration issues. I built and maintained integrations against booking systems, CRMs, and payment platforms, managing OAuth flows, rate limits, and retry logic across service boundaries. I explain complex technical concepts to both technical and non-technical audiences, and I care about solving problems quickly while building long-term client relationships.

Skills

- **API & integration:** REST API design and consumption, JSON, Postman, webhooks, OAuth 2.0, rate-limit handling, retry logic, API troubleshooting and debugging, OpenAPI documentation, Stripe API, third-party platform integration
- **Technical:** TypeScript, JavaScript, Python, Node.js, React, Next.js, PostgreSQL, MySQL, Redis, Supabase, Docker, Git, GitHub Actions CI/CD, AWS (EC2, S3), Vercel, automated testing (Jest, Playwright)
- **Client-facing:** Technical onboarding and support, integration guidance, stakeholder communication, documentation writing, remote-first async collaboration (Slack, Notion), AI-assisted development (Claude Code, Anthropic API, OpenAI API)

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Served as primary technical contact for customer API integrations, guiding clients through REST API setup, debugging webhook configurations, and resolving JSON payload issues using Postman and server logs.
- Built integrations against customer APIs and booking systems (OfficeRnD, Nexudus), CRM pipelines (Attio, Amplemarket, Swan), and payment flows (Stripe), managing OAuth, rate limits, and retry logic across service boundaries.
- Built an AI listing pipeline that orchestrates multi-step LLM agents with tool use, structured output parsing, and retrieval to ingest documents in any format and push validated results to production after human review.
- Designed human-in-the-loop workflows with schema validation and approval gates so non-technical staff could safely review and approve outputs before they reached production.
- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product. Scaled from 2,000 to 4,500+ users.
