Summary

I test web applications, APIs and AI workflows and turn failures into reproducible fixes. At FlowSpace I owned issues across a live marketplace, verified integrations and built support agents with human escalation. At Clubee I ran unit testing and QA while shipping API-connected features. I use TypeScript, JavaScript, Python and Playwright across browser, API and workflow testing.

Skills

- **Quality engineering:** Playwright, browser and API testing, unit testing, QA, regression checks, bug investigation and issue reporting
- **Languages & frameworks:** TypeScript, JavaScript, Python, Next.js, React, Node.js, Laravel (PHP)
- **AI testing:** production AI agents, n8n workflows, OpenAI and Claude APIs, human-in-the-loop review, evals and failure recovery
- **APIs & data:** REST APIs, webhooks, third-party integrations, PostgreSQL, Supabase

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product, mapping the data model and driving the cutover. Scaled it from 2,000 to 4,500+ users.
- Built an AI listing bot with a human in the loop: it takes a brochure in any format (PDF, web page, photo or spreadsheet), drafts the full listing with an LLM, and pushes it to the backend after review.
- Built support AI agents that answer customer queries against live platform data and escalate to a person on low confidence.
- Built CRM and GTM automations with n8n, including a pipeline connecting Attio, Amplemarket and Swan, plus OfficeRnD and Nexudus booking integrations.
- Worked directly with the internal team, an external agency and customers, and resolved issues end to end.
