Summary

I help customers adopt technical products, troubleshoot integrations and carry issues through to resolution. At FlowSpace I supported a live marketplace, coordinated deployments across customers and internal teams, built support workflows against production data, and resolved booking, CRM and access-related integration problems end to end. I work with APIs, Python, TypeScript, PostgreSQL and Linux tools, and I explain technical findings clearly to technical and non-technical stakeholders.

Skills

- **Customer success engineering:** onboarding, implementation support, adoption, ticket investigation, escalation and end-to-end resolution
- **Access-aware troubleshooting:** API debugging, permissions and workflow validation, Linux command line, logs and failure isolation
- **Languages & data:** Python, TypeScript, JavaScript, Node.js, REST APIs, webhooks, PostgreSQL and Supabase
- **Automation & communication:** n8n, support agents, CRM and booking integrations, documentation and stakeholder coordination

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product, mapping the data model and driving the cutover. Scaled it from 2,000 to 4,500+ users.
- Built an AI listing bot with a human in the loop: it takes a brochure in any format (PDF, web page, photo or spreadsheet), drafts the full listing with an LLM, and pushes it to the backend after review.
- Built support AI agents that answer customer queries against live platform data and escalate to a person on low confidence.
- Built CRM and GTM automations with n8n, including a pipeline connecting Attio, Amplemarket and Swan, plus OfficeRnD and Nexudus booking integrations.
- Worked directly with the internal team, an external agency and customers, and resolved issues end to end.
