Summary

I translate customer and stakeholder needs into shipped product improvements, with hands-on engineering depth across AI, APIs and workflow automation. At FlowSpace I took over a live marketplace, mapped the data model and drove its migration to Next.js and Laravel, then built AI agents and automations around live platform data. I write TypeScript, Node.js and Python, work closely with customers and delivery teams, and use Claude Code every day.

Skills

- **Product & delivery:** customer and stakeholder discovery, product requirements, prioritization, backlog-to-release ownership, shipping and iterating on real-world feedback
- **AI & automation:** AI agents built and operated in production, n8n workflow automation, LLM APIs (OpenAI, Claude), RAG, human-in-the-loop review, evals, Claude Code
- **Engineering:** TypeScript, JavaScript, Next.js, React, Node.js, Python, Laravel (PHP), REST APIs, webhooks
- **Platforms & data:** third-party integrations (Attio, Amplemarket, OfficeRnD, Nexudus, Google, Sendgrid), PostgreSQL, Supabase

Experience

FlowSpace.co — **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) — *London, UK (remote)*

- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product, mapping the data model and driving the cutover. Scaled it from 2,000 to 4,500+ users.
- Built an AI listing bot with a human in the loop: it takes a brochure in any format (PDF, web page, photo or spreadsheet), drafts the full listing with an LLM, and pushes it to the backend after review.
- Built support AI agents that answer customer queries against live platform data and escalate to a person on low confidence.
- Built CRM and GTM automations with n8n, including a pipeline connecting Attio, Amplemarket and Swan, plus OfficeRnD and Nexudus booking integrations.
- Worked directly with the internal team, an external agency and customers, and resolved issues end to end.
