Prabhavit Gupta

Forward Deployed Engineer, Python & API Integrations, Customer-Facing Technical Delivery

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy

Summary

Forward deployed engineer who ships integrations, debugs data flows, and works directly with customers to get them live and keep them successful. At FlowSpace I built and maintained integrations against booking systems, CRMs, and payment platforms, managing REST APIs, webhooks, OAuth flows, rate limits, and retry logic across service boundaries. I built a data pipeline that ingests documents in any format (PDF, web page, spreadsheet, photo), transforms and validates the data with Python and SQL, and pushes clean results to PostgreSQL after human review. I spent a meaningful share of my time working directly with customers and non-technical stakeholders, translating their requirements into working systems and debugging issues end to end. I write production Python and TypeScript daily, run complex SQL queries for investigation and reporting, and take full ownership from initial customer conversation through deployment and monitoring.

Skills

- **Integration & data:** Python, SQL (complex joins, aggregations, window functions), REST API design and integration, webhooks, OAuth 2.0, data extraction and transformation pipelines, ETL workflows, n8n workflow orchestration, data validation and schema enforcement, PostgreSQL, MySQL, Supabase, Redis, debugging and investigation across distributed systems
- **AI & automation:** Claude Code (daily driver), Anthropic API, OpenAI API, LLM-powered data extraction, structured output parsing, prompt engineering, retrieval-augmented generation (RAG), human-in-the-loop review workflows, confidence scoring, evaluation frameworks, Model Context Protocol (MCP), process automation
- **Fullstack & infrastructure:** TypeScript, JavaScript, React, Next.js, Node.js, Git, GitHub Actions CI/CD, AWS (EC2, S3, CloudWatch), Vercel, JWT, RBAC, Docker, automated testing (Jest, Playwright), Agile/Scrum

Experience

FlowSpace.co — **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) — *London, UK (remote)*

- Built an AI listing pipeline that orchestrates multi-step LLM agents with tool use, structured output parsing, and retrieval to ingest documents in any format (PDF, web page, photo, spreadsheet) and push validated results to production after human review. Handles hundreds of sources with different formats.
- Designed human-in-the-loop workflows with schema validation, approval gates, and escalation paths so non-technical staff could safely review and approve AI outputs before they reached production.
- Built integrations against customer APIs and booking systems (OfficeRnD, Nexudus), CRM pipelines (Attio, Amplemarket, Swan), and payment flows (Stripe), managing rate limits, webhooks, and retry logic across service boundaries.
- Built RAG-backed support agents that answer customer queries against live platform data and escalate to a person on low confidence. Implemented confidence scoring and retrieval quality monitoring.
- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product. Scaled from 2,000 to 4,500+ users.

Get2Germany.com — **Jan 2024 – May 2024**
Developer & Automation Specialist (Part-time) — *Berlin, Germany*

Integrated Google APIs, built AI tools to find courses, internships and jobs, and optimized the database. Stack: n8n, Google APIs.

Clubee.com — **Sep 2023 – Aug 2024**
Developer & QA (Full-time, Freelance) — *Foetz, Luxembourg*

Integrated the Clubee API across the frontend, ran unit testing and QA, and built shop and federation-dashboard tools.

Tractionboard.co — **Aug 2023 – Oct 2023**
Developer (Internship) — *Utrecht, Netherlands*

Integrated ChatGPT/OpenAI and Sendgrid, built responsive designs, and debugged features.

Freelance Projects

- **Urlink** (2025), Project Manager & AI-Assisted Developer. Worked directly with the client on requirements, built the platform and its logic, and implemented client-driven automations. Stack: Next.js, Supabase, Netlify.
- **UltraStrategy** (2024 to 2025), AI Automation Developer. Built a CV-parsing tool (LLM data extraction) with n8n and Eden AI, and a platform serving different user profiles.
- **Qomodo** (2024 to 2025), AI Developer. Built a dashboard for companies to manage their branches, and implemented Figma designs.

Certifications

Microsoft Copilot Studio Agent Academy • Microsoft: Introduction to building AI agents • Microsoft Power Automate • Tray.AI Build Practitioner (Sep 2024)

Education

Ca' Foscari University of Venice Oct 2020 – Jun 2024

BA Philosophy, International Studies & Economics (Minor: Entrepreneurship)

Work authorization: European Long Term Residence Permit (Italy), no sponsorship needed in the EU; available immediately.
Languages: Hindi (native), English (professional), Italian (beginner).
