Summary

I help teams adopt software by understanding their workflows, configuring integrations and carrying issues through to resolution. At FlowSpace I worked directly with customers, the internal team and an external agency during a live platform migration, and delivered booking, CRM and AI workflows. I combine technical implementation with clear communication, QA and practical training support.

Skills

- **Onboarding & delivery:** customer discovery, workflow mapping, configuration, QA, training support, troubleshooting and handover
- **Integrations:** REST APIs, webhooks, OfficeRnD, Nexudus, Attio, Amplemarket, Google APIs, Sendgrid
- **AI & automation:** n8n workflows, production AI agents, OpenAI and Claude APIs, support escalation and human review
- **Engineering:** TypeScript, JavaScript, Next.js, React, Node.js, Python, Laravel, PostgreSQL, Supabase

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product, mapping the data model and driving the cutover. Scaled it from 2,000 to 4,500+ users.
- Built an AI listing bot with a human in the loop: it takes a brochure in any format (PDF, web page, photo or spreadsheet), drafts the full listing with an LLM, and pushes it to the backend after review.
- Built support AI agents that answer customer queries against live platform data and escalate to a person on low confidence.
- Built CRM and GTM automations with n8n, including a pipeline connecting Attio, Amplemarket and Swan, plus OfficeRnD and Nexudus booking integrations.
- Worked directly with the internal team, an external agency and customers, and resolved issues end to end.
