Prabhavit Gupta

AI Engineer, Production Agentic Systems & Enterprise AI Integration, Python & TypeScript

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy

Summary

AI engineer who builds production-grade agentic systems that integrate with enterprise platforms and databases. At FlowSpace I designed and shipped a multi-agent AI pipeline that orchestrates LLM agents with tool use, structured output parsing, and retrieval-augmented generation to ingest documents in any format and push validated results to production after human review. I built the full agent lifecycle: retrieval layer design with embeddings and vector search, prompt engineering for multi-step reasoning, confidence scoring with escalation paths, and evaluation and monitoring for agent accuracy, hallucination rates, latency, and cost. I integrated AI solutions with enterprise APIs (booking systems, CRMs, payment platforms), designed human-in-the-loop approval workflows with schema validation, and shipped production systems with automated testing and CI/CD. I work across Python, TypeScript, and React/Next.js with full ownership from architecture to deployment.

Skills

- **AI & agentic systems:** Multi-agent system design and orchestration, tool use and function calling, structured output parsing, retrieval-augmented generation (RAG), vector database retrieval, embeddings, prompt engineering, confidence scoring, guardrails, human-in-the-loop review, evaluation frameworks (accuracy, hallucination, latency, cost), Claude Code (daily driver), Anthropic API, OpenAI API, Model Context Protocol (MCP), rapid prototyping and experimentation
- **Backend & enterprise integrations:** Python, TypeScript, PHP/Laravel, REST API design and consumption, enterprise API integrations (CRM, booking, payment, messaging platforms), webhooks, asynchronous jobs, queues, retry and rate-limit handling, PostgreSQL, MySQL, Redis, Supabase, data extraction and transformation pipelines
- **Infrastructure & delivery:** Docker, Git, GitHub Actions CI/CD, AWS (EC2, S3, CloudWatch), Vercel, cloud-native development practices, automated testing (Jest, Playwright), production monitoring, observability, Agile/Scrum

Experience

FlowSpace.co — **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) — *London, UK (remote)*

- Built an AI listing pipeline that orchestrates multi-step LLM agents with tool use, structured output parsing, and retrieval to ingest documents in any format (PDF, web page, photo, spreadsheet) and push validated results to production after human review. Handles hundreds of sources with different formats.
- Designed human-in-the-loop workflows with schema validation, approval gates, and escalation paths so non-technical staff could safely review and approve AI outputs before they reached production.
- Built integrations against customer APIs and booking systems (OfficeRnD, Nexudus), CRM pipelines (Attio, Amplemarket, Swan), and payment flows (Stripe), managing rate limits, webhooks, and retry logic across service boundaries.
- Built RAG-backed support agents that answer customer queries against live platform data and escalate to a person on low confidence. Implemented confidence scoring and retrieval quality monitoring.
- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product. Scaled from 2,000 to 4,500+ users.

Get2Germany.com — **Jan 2024 – May 2024**
Developer & Automation Specialist (Part-time) — *Berlin, Germany*

Integrated Google APIs, built AI tools to find courses, internships and jobs, and optimized the database. Stack: n8n, Google APIs.

Clubee.com — **Sep 2023 – Aug 2024**
Developer & QA (Full-time, Freelance) — *Foetz, Luxembourg*

Integrated the Clubee API across the frontend, ran unit testing and QA, and built shop and federation-dashboard tools.

Tractionboard.co — **Aug 2023 – Oct 2023**
Developer (Internship) — *Utrecht, Netherlands*

Integrated ChatGPT/OpenAI and Sendgrid, built responsive designs, and debugged features.

Freelance Projects

- **Urlink** (2025), Project Manager & AI-Assisted Developer. Worked directly with the client on requirements, built the platform and its logic, and implemented client-driven automations. Stack: Next.js, Supabase, Netlify.
- **UltraStrategy** (2024 to 2025), AI Automation Developer. Built a CV-parsing tool (LLM data extraction) with n8n and Eden AI, and a platform serving different user profiles.
- **Qomodo** (2024 to 2025), AI Developer. Built a dashboard for companies to manage their branches, and implemented Figma designs.

Certifications

Microsoft Copilot Studio Agent Academy • Microsoft: Introduction to building AI agents • Microsoft Power Automate • Tray.AI Build Practitioner (Sep 2024)

Education

Ca' Foscari University of Venice Oct 2020 – Jun 2024

BA Philosophy, International Studies & Economics (Minor: Entrepreneurship)

Work authorization: European Long Term Residence Permit (Italy), no sponsorship needed in the EU; available immediately.
Languages: Hindi (native), English (professional), Italian (beginner).
