Summary

I troubleshoot customer-facing software, APIs and production workflows end to end, translating technical problems into clear fixes and reliable support. At FlowSpace I support a live marketplace, resolve issues across integrations, dashboards and data, and built AI support agents that answer against live platform data and escalate low-confidence cases. I bring QA, debugging and automation experience across TypeScript, JavaScript, Python, Laravel and n8n, using Claude Code as my primary development tool.

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product, mapping the data model and driving the cutover. Scaled it from 2,000 to 4,500+ users.
- Built an AI listing bot with a human in the loop: it takes a brochure in any format (PDF, web page, photo or spreadsheet), drafts the full listing with an LLM, and pushes it to the backend after review.
- Built support AI agents that answer customer queries against live platform data and escalate to a person on low confidence.
- Built CRM and GTM automations with n8n, including a pipeline connecting Attio, Amplemarket and Swan, plus OfficeRnD and Nexudus booking integrations.
- Worked directly with the internal team, an external agency and customers, and resolved issues end to end.
