Summary

I build AI agents and agentic workflows in production, and I ship the full-stack code around them. At FlowSpace I designed and operated intelligent agents that answer customer queries against live platform data, an AI listing pipeline that turns any document format into structured output with a human in the loop, and n8n-based orchestration connecting CRM, finance and booking systems via APIs and webhooks. I write TypeScript, Python and Node.js, integrate LLM APIs (OpenAI, Claude) daily using Claude Code, and work across business functions to map processes and translate them into working automation.

Skills

- **AI agents & GenAI:** production AI agents, agentic workflows, LLM APIs (OpenAI, Claude), prompt and context engineering, RAG, human-in-the-loop review, evals, Claude Code, n8n orchestration
- **Languages & platforms:** TypeScript, JavaScript, Python, Next.js, React, Node.js, Laravel (PHP), SQL, PostgreSQL, Supabase
- **APIs & integrations:** REST APIs, webhooks, microservices, event-driven architectures, OpenAPI, CRM (Attio, Amplemarket), booking systems (OfficeRnD, Nexudus), finance (Swan), Google APIs, Sendgrid
- **Cross-functional:** partnering with sales, operations, customer success, finance and support stakeholders to map processes and deliver end-to-end automations in Agile teams

Experience

FlowSpace.co **Mar 2024 – Aug 2026**

Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Built AI agents that answer customer queries against live platform data and escalate to a person on low confidence, using LLM APIs and context engineering.
- Built an AI listing bot with a human in the loop: it takes a brochure in any format (PDF, web page, photo or spreadsheet), drafts the full listing with an LLM, and pushes it to the backend after review.
- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product, mapping the data model and driving the cutover. Scaled it from 2,000 to 4,500+ users.
- Built CRM and GTM automations with n8n, including a pipeline connecting Attio, Amplemarket and Swan, plus OfficeRnD and Nexudus booking integrations.
- Worked directly with the internal team, an external agency and customers, and resolved issues end to end.
