Summary

I build and ship practical AI agents and automation systems for real users. I work across Python, TypeScript, Laravel, Next.js, n8n, LLM APIs, and REST integrations, taking systems from prototype through production use and iterative improvement. At FlowSpace I led the migration of a live marketplace onto a coded Next.js + Laravel stack and own the AI features on top.

Selected Projects

- **AI Listing Bot (FlowSpace):** human-in-the-loop tool that ingests a brochure in any format (PDF, website, image, or spreadsheet), drafts a full listing with an LLM, and pushes it to the backend after review. Owned end to end. Stack: n8n, Claude, TypeScript.
- **Platform migration to Next.js + Laravel (FlowSpace):** led the move from a legacy no-code stack to a coded Next.js and Laravel stack. Mapped the data model, chose the migration path per entity (API endpoints or CSV export), and drove the cutover. Scaled from 2,000 to 4,500+ users.
- **CRM & GTM automation (FlowSpace):** built a CRM-to-platform integration for automated lead capture, enrichment, routing, and outbound.
- **Booking API integrations (FlowSpace):** integrated the OfficeRnD and Nexudus APIs for automated bookings.
- **CV parsing tool (UltraStrategy):** LLM data extraction with n8n and Eden AI across multiple user profiles.
