Motivation letter for Application for Senior Software Developer - Full Stack GenAI – Mannheim / Remote

Dear Hiring Manager,

I am applying for the Full Stack GenAI position because rightflow combines end-to-end product engineering, agent orchestration and AI-assisted development in a practical LegalTech product.

Over the past three years I have turned business requirements into production features across several European technology projects.

At UltraStrategy I built an AI-based CV parsing workflow using n8n and Eden AI, and at Clubee I worked on API integration and QA.

At FlowSpace I built AI support agents, GTM automations and data-parsing tools while helping grow the platform from 2,000 to more than 4,500 users.

My strongest fit is product-focused full-stack and applied AI development. I have integrated OpenAI, Anthropic, OfficeRnD and Nexudus APIs. My infrastructure depth is lighter than that of someone who has worked exclusively with Kubernetes or hyperscalers, but I bring practical ownership across frontend, backend, AI workflows, integrations and QA.

I use Claude Code alongside TypeScript, Next.js, Laravel and Supabase, and verify generated changes before shipping them.

I am based in Venice, hold an EU long-term residence permit and am available immediately.

I would welcome the opportunity to discuss how my full-stack delivery and applied AI experience could help rightflow turn complex legal workflows into dependable product features.

Thank you for your time and consideration.

Sincerely,

Prabhavit Gupta

I hereby authorize the processing of my personal data contained in this document in compliance with the European General Data Protection Regulation (EU Regulation 2016/679) and Italian Legislative Decree 196/2003, as modified by Legislative Decree 101/2018, for the purposes of recruitment and selection.
