Summary

I build customer-facing web products with Next.js, React and TypeScript. At FlowSpace I helped migrate a live marketplace to a coded Next.js and Laravel product, translated existing workflows into responsive interfaces, connected frontend features to APIs and resolved production issues end to end. I also built AI-assisted product workflows and work comfortably in fast-moving environments where priorities and user feedback shape delivery.

Skills

- **Frontend engineering:** Next.js, React, TypeScript, JavaScript, responsive interfaces, reusable components and end-to-end feature ownership
- **Product integration:** REST APIs, webhooks, Supabase, PostgreSQL, Laravel backends and third-party platform integrations
- **Quality & delivery:** Playwright, unit testing, QA, Git, CI/CD, production debugging and iterative delivery with users and designers
- **AI-assisted products:** OpenAI and Claude APIs, document workflows, support agents, n8n automation and human-in-the-loop review

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product, mapping the data model and driving the cutover. Scaled it from 2,000 to 4,500+ users.
- Built an AI listing bot with a human in the loop: it takes a brochure in any format (PDF, web page, photo or spreadsheet), drafts the full listing with an LLM, and pushes it to the backend after review.
- Built support AI agents that answer customer queries against live platform data and escalate to a person on low confidence.
- Built CRM and GTM automations with n8n, including a pipeline connecting Attio, Amplemarket and Swan, plus OfficeRnD and Nexudus booking integrations.
- Worked directly with the internal team, an external agency and customers, and resolved issues end to end.
