Summary

Full-stack AI engineer who builds LLM-powered products end to end: Python backends, TypeScript frontends, and agentic workflows that run in production. At FlowSpace I built an AI pipeline that orchestrates multi-step LLM agents with structured outputs, tool use, and retrieval to ingest documents in any format and push validated results to production after human review. I ship across the full lifecycle (prototype, iterate, ship, maintain), design governed workflows with approval gates and escalation paths, and care about building AI interfaces that users actually trust. Open to relocation within the EU.

Skills

- **AI & LLM:** LLM API integration (Anthropic Claude, OpenAI), structured output parsing, tool use, agentic workflows, RAG (embeddings, vector search, confidence scoring), prompt engineering, AI-assisted development (Claude Code daily driver)
- **Full stack:** Python, TypeScript, JavaScript, React, Next.js, Node.js, PostgreSQL, MySQL, Supabase, Redis, Docker, Git, GitHub Actions CI/CD, AWS (EC2, S3), Vercel, Terraform (basic), automated testing (Jest, Playwright)
- **Integration & infra:** REST API design, webhooks, OAuth 2.0, rate-limit handling, retry logic, cloud deployment, third-party API integration (Stripe, CRM, booking systems), remote-first async collaboration (Slack, Notion)

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Built an AI listing pipeline that orchestrates multi-step LLM agents with tool use, structured output parsing, and retrieval to ingest documents in any format (PDF, web page, photo, spreadsheet) and push validated results to production after human review. Handles hundreds of sources with different formats.
- Designed governed agentic workflows with schema validation, approval gates, and escalation paths so non-technical staff could safely review and approve AI outputs before they reached production.
- Built RAG-backed support agents that answer customer queries against live platform data and escalate to a person on low confidence. Implemented confidence scoring and retrieval quality monitoring.
- Built integrations against customer APIs and booking systems (OfficeRnD, Nexudus), CRM pipelines (Attio, Amplemarket, Swan), and payment flows (Stripe), managing rate limits, webhooks, and retry logic across service boundaries.
- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product. Scaled from 2,000 to 4,500+ users.
