Summary

I build and ship production AI systems end to end. At FlowSpace I designed and built an AI agent pipeline that ingests unstructured data in any format (PDFs, websites, spreadsheets, photos), orchestrates multi-step LLM reasoning chains (Claude, OpenAI), routes through human review with tool-calling agents, and publishes structured records to the platform. This system processed 900+ listings autonomously and cut provider onboarding from days to hours. I own evaluation and iteration: when agents produce bad output, I trace the failure through the chain, adjust prompts, context windows, and tool definitions, and re-evaluate against production cases. I use Claude Code as my primary development tool daily, building with TypeScript, Next.js, Python, and PostgreSQL (Supabase). I led the migration of the full platform off a legacy stack to Next.js and Laravel, scaling from 2,000 to 4,500+ users while the product stayed live. I also built API integrations (OfficeRnD, Nexudus, Stripe) and workflow automations with n8n. I work best with high ownership, shipping fast, and debugging hard problems. Based in Italy with an EU long-term residence permit, available immediately.

Experience

FlowSpace.co — **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) — *London, UK (remote)*

- Integrated OfficeRnD and Nexudus APIs end to end: connect flow, location sync, resource mapping, and automated bookings. Owned the full integration lifecycle from technical scoping to production.
- Ran technical onboarding for new workspace providers joining the platform. Configured their accounts, mapped their data, and resolved issues directly.
- Built an AI listing bot: takes a brochure in any format (PDF, web, photo, spreadsheet), drafts the listing via LLM, routes through human review, then pushes to the backend.
- Migrated the platform off a legacy stack to Next.js and Laravel. Mapped the data model, drove the cutover while the product stayed live. Scaled from 2,000 to 4,500+ users.
- Built CRM and GTM automations with n8n, plus AI support agents that answer queries against live platform data.
