Summary

I build AI products from discovery to production using Claude Code as my daily development tool. At FlowSpace I shipped an AI listing pipeline that ingests unstructured data in any format (PDFs, websites, photos, spreadsheets), extracts structured records via Anthropic and OpenAI API calls with prompt engineering, function calling, and context management, routes through human review, and publishes to the platform. It processed 900+ listings autonomously. I ran client delivery end to end: technical scoping calls, solution design, demos, onboarding, and post-launch support for workspace providers joining the platform. I integrated OfficeRnD and Nexudus APIs with OAuth2, webhooks, retries, and monitoring, owning each integration from first call to production. I built n8n and Make.com workflows that orchestrate APIs, webhooks, and LLM calls to automate CRM processes, provider onboarding, and content generation. I built web scrapers and data pipelines feeding Supabase, PostgreSQL, and Google Sheets. Based in Italy with an EU long-term residence permit, available immediately.

Experience

FlowSpace.co — **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) — *London, UK (remote)*

- Integrated OfficeRnD and Nexudus APIs end to end: connect flow, location sync, resource mapping, and automated bookings. Owned the full integration lifecycle from technical scoping to production.
- Ran technical onboarding for new workspace providers joining the platform. Configured their accounts, mapped their data, and resolved issues directly.
- Built an AI listing bot: takes a brochure in any format (PDF, web, photo, spreadsheet), drafts the listing via LLM, routes through human review, then pushes to the backend.
- Migrated the platform off a legacy stack to Next.js and Laravel. Mapped the data model, drove the cutover while the product stayed live. Scaled from 2,000 to 4,500+ users.
- Built CRM and GTM automations with n8n, plus AI support agents that answer queries against live platform data.
