Summary

I deploy AI tools and automation systems that replace manual work and stick in production. At FlowSpace I built an AI listing pipeline: it takes any document format (PDF, web, photo, spreadsheet), processes it through Claude and OpenAI APIs with structured outputs and function calling, routes through human review, then pushes to the backend. It produced 900+ reviewed records. I built custom integrations connecting client data into AI workflows (OfficeRnD, Nexudus via OAuth2 and webhooks), and trained client teams on adoption. I built n8n and Make automations that handle lead routing, data sync, and support queries autonomously, plus AI agents that answer queries against live platform data. I work across LLM APIs, automation platforms, REST integrations, and client enablement. Based in Italy, EU long-term residence permit, available immediately.

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Integrated OfficeRnD and Nexudus APIs end to end: connect flow, location sync, resource mapping, and automated bookings. Owned the full integration lifecycle from technical scoping to production.
- Ran technical onboarding for new workspace providers joining the platform. Configured their accounts, mapped their data, and resolved issues directly.
- Built an AI listing bot: takes a brochure in any format (PDF, web, photo, spreadsheet), drafts the listing via LLM, routes through human review, then pushes to the backend.
- Migrated the platform off a legacy stack to Next.js and Laravel. Mapped the data model, drove the cutover while the product stayed live. Scaled from 2,000 to 4,500+ users.
- Built CRM and GTM automations with n8n, plus AI support agents that answer queries against live platform data.
