## Summary

I deploy CRM, automation, and AI solutions for clients end to end: identify operational issues, build the technical fix, and train teams to adopt it. At FlowSpace I was the primary technical contact for workspace providers joining the platform. I scoped their requirements, configured CRM integrations (OfficeRnD, Nexudus via OAuth2 and webhooks), mapped their data, built automation workflows, and resolved issues directly. I managed multiple concurrent client engagements while owning the full implementation lifecycle. I also built an AI-powered listing pipeline that processes any document format through LLM APIs, routes through human review, and pushes to production (900+ records). I built n8n automations for lead routing, data sync, and support, plus AI agents that answer queries against live data. Based in Italy, EU long-term residence permit, available immediately.

**FlowSpace.co** **Mar 2024 – Aug 2026**
*Full-Stack & AI Engineer (Full-time, Freelance)* *London, UK (remote)*

- Integrated OfficeRnD and Nexudus APIs end to end: connect flow, location sync, resource mapping, and automated bookings. Owned the full integration lifecycle from technical scoping to production.
- Ran technical onboarding for new workspace providers joining the platform. Configured their accounts, mapped their data, and resolved issues directly.
- Built an AI listing bot: takes a brochure in any format (PDF, web, photo, spreadsheet), drafts the listing via LLM, routes through human review, then pushes to the backend.
- Migrated the platform off a legacy stack to Next.js and Laravel. Mapped the data model, drove the cutover while the product stayed live. Scaled from 2,000 to 4,500+ users.
