Summary

I build and operate production automations and AI-powered workflows. At FlowSpace I designed n8n workflows that orchestrate APIs, webhooks, and LLM calls to automate CRM operations, provider onboarding, and GTM processes. I built an AI agent pipeline that ingests unstructured data in any format (PDFs, websites, photos, spreadsheets), classifies and extracts structured records via LLM reasoning chains (Claude, OpenAI), routes through human review with guardrails, and publishes to the platform. This processed 900+ listings autonomously and cut provider onboarding from days to hours. I also built API integrations end to end (OfficeRnD, Nexudus, Stripe) with proper auth (OAuth2), webhooks, retries, and monitoring. I led the migration of the full platform off a legacy stack to Next.js and Laravel, scaling from 2,000 to 4,500+ users while the product stayed live. I use Claude Code as my primary development tool daily. Based in Italy with an EU long-term residence permit, available immediately.

- Ran technical onboarding for new workspace providers joining the platform. Configured their accounts, mapped their data, and resolved issues directly.
- Built an AI listing bot: takes a brochure in any format (PDF, web, photo, spreadsheet), drafts the listing via LLM, routes through human review, then pushes to the backend.
- Migrated the platform off a legacy stack to Next.js and Laravel. Mapped the data model, drove the cutover while the product stayed live. Scaled from 2,000 to 4,500+ users.
- Built CRM and GTM automations with n8n, plus AI support agents that answer queries against live platform data.
