Summary

I build workflow automations, integrations and AI agents in production, and I ship the full-stack code around them. At FlowSpace I designed and maintained n8n-based CRM and GTM automations connecting multiple systems via APIs and webhooks, built LLM-powered agents that answer customer queries against live data, and built an AI listing pipeline that turns any document format into structured output with a human in the loop. I work across business functions (sales, marketing, customer success, operations) to identify automation opportunities and translate them into technical solutions. I write Python, TypeScript and Node.js, and wire in OpenAI and Claude APIs.

Skills

- **Automation & AI:** n8n workflow automation, AI agents built and operated in production, LLM APIs (OpenAI, Claude), RAG, prompt and context engineering, human-in-the-loop review, evals, Microsoft Power Automate certified
- **Languages & platforms:** Python, TypeScript, JavaScript, Next.js, React, Node.js, Laravel (PHP), SQL, PostgreSQL, Supabase
- **Integrations & data:** REST APIs, webhooks, event-driven architectures, CRM integrations (Attio, Amplemarket), booking systems (OfficeRnD, Nexudus), Google APIs, Sendgrid
- **Cross-functional:** working with sales, marketing, customer success, finance and operations stakeholders to identify automation and AI opportunities, owning problems end to end

Experience

FlowSpace.co **Mar 2024 – Aug 2026**

Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product, mapping the data model and driving the cutover. Scaled it from 2,000 to 4,500+ users.
- Built an AI listing bot with a human in the loop: it takes a brochure in any format (PDF, web page, photo or spreadsheet), drafts the full listing with an LLM, and pushes it to the backend after review.
- Built support AI agents that answer customer queries against live platform data and escalate to a person on low confidence.
- Built CRM and GTM automations with n8n, including a pipeline connecting Attio, Amplemarket and Swan, plus OfficeRnD and Nexudus booking integrations.
- Worked directly with the internal team, an external agency and customers, and resolved issues end to end.
