Summary

Claude Code is my primary development environment. I use it daily to architect, build, test and ship production systems, including multi-agent orchestration with the Claude API, MCP servers and structured tool calling. At FlowSpace I owned the full AI layer on a live coworking marketplace: an autonomous listing pipeline that ingests documents in any format, drafts structured listings via Claude, validates with human-in-the-loop review, and pushes to the backend. I also built support agents, integrated third-party APIs, and migrated the platform off a legacy stack to Next.js and Laravel. I write Python, TypeScript and Bash, design prompts and context windows for production, and enjoy teaching others how to build with these tools.

Experience

FlowSpace.co — **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) — *London, UK (remote)*

- Built an AI listing bot with a human in the loop: it takes a brochure in any format (PDF, web page, photo or spreadsheet), drafts the full listing with an LLM, and pushes it to the backend after review.
- Built support AI agents that answer customer queries against live platform data and escalate to a person on low confidence.
- Took over a live marketplace on a legacy stack and worked with the team to migrate it to a coded Next.js and Laravel product, mapping the data model and driving the cutover. Scaled it from 2,000 to 4,500+ users.
- Built CRM and GTM automations with n8n, including a pipeline connecting Attio, Amplemarket and Swan, plus OfficeRnD and Nexudus booking integrations.
- Worked directly with the internal team, an external agency and customers, and resolved issues end to end.
