Summary

I build and own production AI automations end to end. At FlowSpace I shipped an AI listing pipeline that calls Anthropic and OpenAI APIs directly (prompt engineering, function calling, structured outputs) to extract and enrich records from unstructured data, route them through human review, and publish to the platform. It processed 900+ listings autonomously with monitoring and error handling throughout. I built n8n and Make.com workflows that automate lead routing, CRM processes, content generation, and provider onboarding by orchestrating APIs, webhooks, and LLM calls. I integrated OfficeRnD and Nexudus APIs end to end: OAuth2, pagination, rate limiting, retries, and webhooks between HubSpot-class CRMs and platform backends. I version and evaluate every prompt I ship: evaluation pipelines for LLM outputs, A/B testing of prompt variants, and cost tracking across all automations. Based in Italy with an EU long-term residence permit, available immediately and open to relocating to the UK.

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Integrated OfficeRnD and Nexudus APIs end to end: connect flow, location sync, resource mapping, and automated bookings. Owned the full integration lifecycle from technical scoping to production.
- Ran technical onboarding for new workspace providers joining the platform. Configured their accounts, mapped their data, and resolved issues directly.
- Built an AI listing bot: takes a brochure in any format (PDF, web, photo, spreadsheet), drafts the listing via LLM, routes through human review, then pushes to the backend.
- Migrated the platform off a legacy stack to Next.js and Laravel. Mapped the data model, drove the cutover while the product stayed live. Scaled from 2,000 to 4,500+ users.
- Built CRM and GTM automations with n8n, plus AI support agents that answer queries against live platform data.
