## Summary

I build frontend-heavy products in TypeScript and React, from greenfield features to full platform migrations. At FlowSpace I rebuilt the marketplace UI in Next.js, integrated third-party APIs across the stack, and shipped AI-powered tools that thousands of users interact with daily. I care about clean component architecture, fast iteration, and shipping features that people actually use. Based in the EU, available immediately, no sponsorship needed.

## Experience

**FlowSpace.co** **Mar 2024 – Aug 2026**
*Full-Stack & AI Engineer (Full-time, Freelance)* *London, UK (remote)*

- Integrated OfficeRnD and Nexudus APIs end to end: connect flow, location sync, resource mapping, and automated bookings. Owned the full integration lifecycle from technical scoping to production.
- Ran technical onboarding for new workspace providers joining the platform. Configured their accounts, mapped their data, and resolved issues directly.
- Built an AI listing bot: takes a brochure in any format (PDF, web, photo, spreadsheet), drafts the listing via LLM, routes through human review, then pushes to the backend.
- Migrated the platform off a legacy stack to Next.js and Laravel. Mapped the data model, drove the cutover while the product stayed live. Scaled from 2,000 to 4,500+ users.
- Built CRM and GTM automations with n8n, plus AI support agents that answer queries against live platform data.
